

Minneapolis, Minnesota,

August 10th, 1936.

Dear Harry:-

I am in receipt of your letter of July 27th, and sure was glad to hear from you; it was particularly pleasing to read that your dear mother was home from the hospital and we hope and pray that this letter will find her up and around and feeling herself again.

I just received a letter from our friend Mr. W. L. Keate, of your City which came vis Air-Mail, as follows:

"Dear Mr. Dalkin: If you have any particulars or cruise of the total amount of timber on your Nitinat stand, wish you would be good enough to send same to me by return mail. Do not care particularly for the details on each section, but would like to know the total amount of timber and also the total of each specie.

I have been asked to get some information on timber holdings in this district by some responsible people, and wish to include your timber in the report I am making up, so will appreciate receiving information asked for. Yours very truly, W. L. Keate. "

The above Harry which is self-explanatory, and you being personally acquainted with Mr. Keate, also having a copy of the cruise and being on the ground floor, I hope you will find time to see him in person or otherwise and full fill his request.

I hope that it will not interfere with your work in any way and I thank you in advance.

I have not heard from Bloedel, Stewart & Welch as yet presuming that they have not got around to write as yet, or if they are interested or not. Time will tell, but in the meantime?

Let me hear from you at your convenience fully and freely. Give our love to your dear mother Ray and her family.

Affectionately,

Harry D.
